"A" letter

Dr David Stone
Associate Research Director
Council for Tobacco Research - USA Inc
900 Third Avenue
New York 10022
USA

Dear Dr Stone

Following a review of the research programme in my laboratory on the cell biology of the human prostate, we decided that our studies could benefit from some additional work on the autocrine/paracrine regulatory factors responsible for the growth of the gland in the absence of androgens.

I am aware that the Council for Tobacco Research has supported, in the past, some work along those lines and I am now writing to enquire whether the Council is still in a position to support further work in this direction. So, perhaps you would be kind enough to send me the instructions for the submission of applications.

With many thanks
Yours sincerely

Dr Fouad K Habib
